General Information for Participants

■ **Registration**

The registration desk will be situated on the **4th Floor** at the **Kyoto Research Park** during the following time:

13:00-17:00 Tuesday, March 29, 2016

08:00-17:30 Wednesday, March 30, 2016

08:30-17:30 Thursday, March 31, 2016

■ **Organizer**

Higher Education Forum (HEF)

Tel: + 886 2 2740 1498 | www.prohef.org

■ **A Polite Request to All Participants**

Participants are requested to arrive in a timely fashion for all addresses. Presenters are reminded that the time slots should be divided fairly and equally by the number of presentations, and that they should not overrun. The session chair is asked to assume this timekeeping role and to summarize key issues in each topic.

Sandals or Slippers

Tank Top

Shorts

■ **Certificate**

Certificate of Presentation or Certificate of Attendance

A certificate of attendance includes participant's name and affiliation, certifying the participation in the conference. A certificate of presentation indicates a presenter's name, affiliation and the paper title that is presented in the scheduled session.

Certificate Distribution

Oral presenters will receive a certificate of presentation from the session chair after their presentations or at the end of the session. Poster presenters will receive a certificate of presentation from the conference staff at the end of their poster session.

The certificate of presentation will not be issued, either at or after the conference, to authors whose papers are registered but not presented. Instead, the certificate of attendance will be provided after the conference.

■ Preparation for Oral Presentations

All presentation rooms are equipped with a screen, an LCD projector, and a laptop computer installed with Microsoft PowerPoint. You will be able to insert your USB flash drive into the computer and double check your file in PowerPoint. We recommend you to bring two copies of the file in case that one fails. You may also connect your own laptop to the provided projector; however please ensure you have the requisite connector.

Preparation for Poster Presentation

Materials Provided by the Conference Organizer:

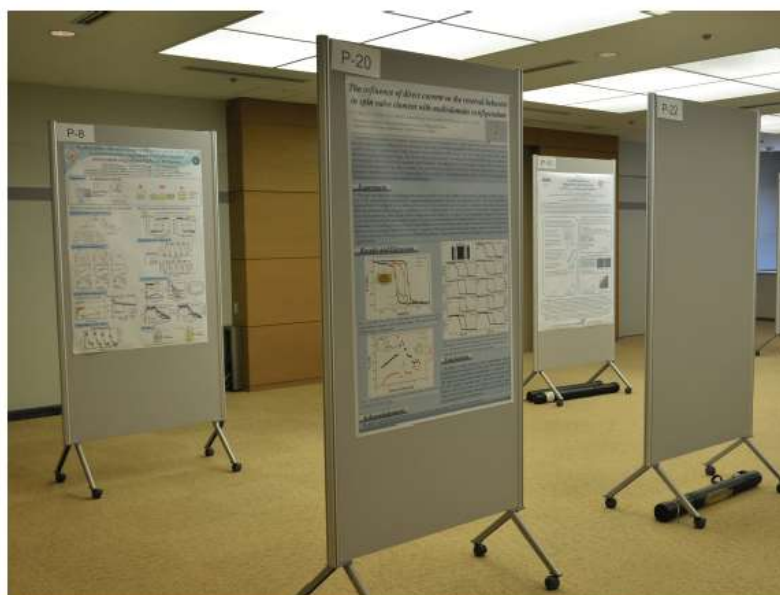

1. Poster Panel (90cm×173cm)
2. Push pins

Materials Prepared by the Presenters:

1. Home-made poster(s)
2. Material: not limited, can be posted on the poster panel
3. Maximum poster size is A0

Conference Venue Information

Kyoto Research Park

Tel: +81-75-322-7800

Address: 134, Chudoji Minami-machi, Shimogyo-ku, Kyoto 600-8813, Japan

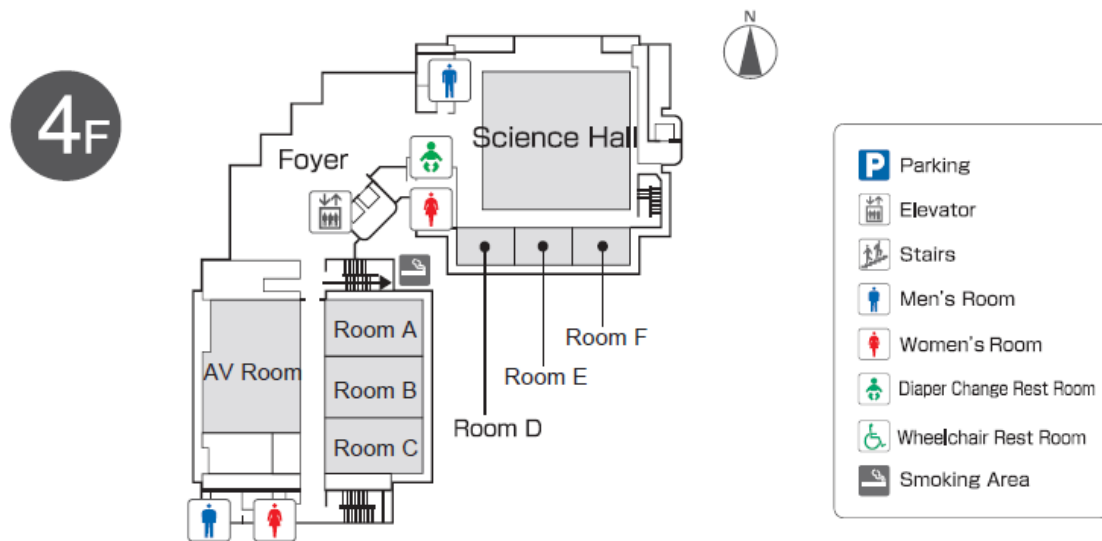

Located at the ancient capital of Japan, Kyoto Research Park (KRP) is set at a convenient spot. KRP has a wide variety of networks involving universities, industries, administrative institutes, public research institutes, and economic bodies. KRP offers various of conference rooms, offices, and labs.

The conference will be held at Hall 1 inside the research park. Hall 1 is near to JR Tanbaguchi-Eki.

Topic:

Future Distributed Applications Based on Mobile Cloud Computing and Software-Defined Networks

Sergei Gorlatch

Professor
Computer Science
University of Muenster
Germany

Abstract

We consider an emerging class of challenging networked multimedia applications called Real-Time Online Interactive Applications (ROIA). ROIA are networked applications connecting a potentially very high number of users who interact with the application and with each other in real time, i.e., a response to a user's action happens virtually immediately. Typical representatives of ROIA are multiplayer online computer games, advanced simulation-based e-learning and serious gaming. All these applications are characterized by high performance and QoS requirements, such as: short response times to user inputs (about 0.1-1.5 s); frequent state updates (up to 100 Hz); large and frequently changing numbers of users in a single application instance (up to tens of thousands simultaneous users).

This talk will address two challenging aspects of future Internet-based ROIA applications: a) using Mobile Cloud Computing for allowing high application performance when a ROIA application is accessed from multiple mobile devices, and b) managing dynamic QoS requirements of ROIA applications by employing the emerging technology of Software-Defined Networking (SDN).

Brief Introduction of Dr. Sergei Gorlatch

Sergei Gorlatch has been Full Professor of Computer Science at the University of Muenster (Germany) since 2003. Earlier he was Associate Professor at the Technical University of Berlin, Assistant Professor at the University of Passau, and Humboldt Research Fellow at the Technical University of Munich, all in Germany. Prof. Gorlatch has about 200 peer-reviewed publications in renowned international books, journals and conferences. He was principal investigator in several international research and development projects in the field of parallel, distributed, Grid and Cloud algorithms, networking and computing, as well as e-Learning, funded by the European Commission and by German national bodies. Among his recent achievements in the area of communications and future Internet is the novel Real-Time Framework (www.real-time-framework.com) developed in his group as a platform for high-level development of real-time, highly interactive applications. In the area of networking, his group has been recently working in the pan-European project OFERTIE on an application-oriented Quality of Service approach for emerging Software-Defined Networks (SDN).

Impressive Slideshow without Presentation Software

Kazuaki Maeda

Professor

Department of Business Administration and Information
Science

Chubu University

Japan

Abstract

When we give a presentation at conferences, we usually use one of desktop presentation software such as Powerpoint, OpenOffice.org and Keynote. This talk shows how to create slides and run a slideshow

without the presentation software. We can use open source software such as web browsers, LaTeX and JavaFX to make the slideshow. It supports running the slideshow with eye-catching transitions.

Brief Introduction of Dr. Kazuaki Maeda

He graduated from Graduate School of Science and Technology in Keio University. After leaving Keio University, he got an academic position at Chubu University in Japan. Now he is a professor at Department of Business Administration and Information Science at Chubu University. His research interests are Web Applications, Open Source Software, Domain Specific Languages, Compiler Construction, Object-Oriented Programming.

Topic:

Integrating Intercultural Awareness in Education

Michelle Kawamura

Faculty of Economics
Ritsumeikan University
Japan

Introduction of the speaker& speech:

It is my pleasure to be here, at this conference, meeting you all. We are very fortunate to be here, free of oppression, violence and/or any constraints, to share our expertise in various disciplines. We should treasure this freedom and spread the same spirit to our students, our peers and the people we encounter every day. The topic I would like to share with you today is intercultural awareness. My research has mainly focused on intercultural awareness and competence between students and teachers of different countries. Let me first introduce myself.

I am a member of the Faculty of Economics at Ritsumeikan University. Other than teaching Economics, Microeconomics in particular, my main responsibilities are planning and designing the English curriculum and integrating that curriculum with social, environmental and economic content. The content we write is derived from domestic and international issues. Our main purpose is to bring our students an awareness of global challenges with critical thinking training and the facts researched to support their logic. This kind of education which involves logical thinking in order to develop empathy towards the world is so vital in education in all disciplines today. Whether you are a professional in the field of science, business, environment or education, the teaching of content involving authentic world issues can bring out the inner humanity in our students and bring them a

step closer to intercultural awareness. We, the educators, future educators and researchers can prepare our students for an ever complex society and to be a real global citizens.

Again, today, we are so fortunate to be here meeting professionals from disciplines in the fields of natural sciences and engineering (ICNSE), chemical, biological and environmental sciences (ICCBES), social science and management (ICSSAM), Education, psychology and social sciences (ISEPSS) and engineering and information (ICEAI). This conference is a bona fide example of a pool of people of different religions, cultures and academic backgrounds getting together to discuss issues pertinent to us all. I believe the professionals here share my thoughts and this vision.

Encountering cross-cultural issues has become inevitable in our society throughout the world. Fitzpatrick and O'Dowd (2012) stated that in the 21st century workplace, cross-cultural communicative competence is a critically important ability. Raising cultural awareness and building multicultural sensitivity (Klinge & Rohmann, 2009) have been emphasized in the development of students' future careers. In fact, in recent years, cross-cultural communication has been integrated into curricula in many European countries (Walton, Priest, & Paradies, 2013). I would like to add that the purpose of building cross-cultural awareness should be foundational and not just for work purposes.

In many cases, the training of cross-cultural communication takes place in language classes.

However, often, teachers have no training in cross-cultural understanding. Also, the learning and training of cross-cultural communication needs to incorporate into real life issues, critical international issues and humanitarian issues.

Teachers' lack of the notion of becoming interculturally aware and the flexibility to respect cultural differences affects their students in the materials selected, instructions carried out, and in behavior (Sercu, 2005). This situation remains while the speed of globalization is proceeding, and the gap between the intercultural awareness among teachers and appropriate instruction becomes wider. This calls for a discussion of intercultural awareness and the teachers' new responsibilities in the current globalizing society (Sercu, 2005).

Earlier I talked about the lack of training in cross-cultural understanding and the teaching to bring such awareness into our classrooms. I would like to say that a teacher's awareness and interests in fostering the skills among our students to be compassionate and responsible citizens is more important than technical training.

It is the teacher's responsibility to take a step further to research how to link their discipline, their expertise and their research to real situations in their classrooms. It is the teachers' responsibility to integrate not only the knowledge in the textbook but to also to make this knowledge a living tool for their students.

My undergraduate degree was in economics, and my masters and doctorate in education. That probably explains why I am teaching in the school of Economics and planning curriculums to bridge social, environmental and economic issues into our classes at Ritsumeikan University. An example is the topic of poverty which we included as a chapter in our English communication and writing textbooks. This chapter included information regarding poverty in all countries both developing and developed. In this chapter we also included the utility of happiness, our social responsibilities, and corporate and government social responsibilities. We want to deliver the message that we all share the same problems in our societies and seek steps to help each other for a more ideal future. In addition to the topics of the contents we teach we also place emphasis on research and verifying information researched to ensure reliability. Since 2009 I have been conducting researches on cross-cultural communication to promote intercultural awareness. These researches are collaborative with professors from Taiwan and Korea. We have our students from Korea, Taiwan and Japan communicate using an internet platform. Our intention was to examine students' willingness to communicate before and after the implementation of the international communication projects we'd set up for them. In all results, the overall outcome is positive in students' perception of cross-cultural communication and future willingness to communicate with people of different cultures. In the classes at the School of Economics of Ritusmeikan, we are preparing students for cross-cultural communication through fostering awareness and interests of other cultures by learning international issues and problems that all countries are sharing. Then through this experiment we have brought students to real person to person communication. Just like this conference, as educators, we should foster students with higher critical thinking skills in today's complex globalizing society. Lastly, let's treasure our time here today and spread the same spirit to our students, our peers and the people we encounter every day.

Foyer Area

ACEAIT-7370

Mass Minimization on a Lower Extremity Exoskeleton Frame for Load-Carrying Assistive Exoskeleton Using Genetic Algorithms

Warawuth Surojananon | *Mahidol University*

Rung Kittipichai | *Mahidol University*

ACEAIT-7387

Meso-Scale Modeling of the Drilling of Carbon Fiber Reinforced Plastic: Geometry and Numerical Analysis

Sinan Al-Wandi | *RMIT University*

Wencheng Pan | *The University of Huddersfield*

Songlin Ding | *RMIT University*

John P.T. Mo | *RMIT University*

ACEAIT-7478

Aeroelastic Simulations of Wind Turbine Rotor Blades Using a Coupled CFD-CSD Methodology

Dong Ok Yu | *Korea Advanced Institute of Science and Technology*

Oh Joon Kwon | *Korea Advanced Institute of Science and Technology*

ACEAIT-7402**The Effect of Polarization Maintaining Fiber on Tapered Fiber Sensor Employed Fiber Loop Mirror Interferometer**

Yi-Cheng Hsu | *National Pingtung University of Science and Technology*

Yu-Sheng Zhu | *National Pingtung University of Science and Technology*

Yeu-Chern Li | *National Pingtung University of Science and Technology*

Cheng-Wei Li | *National Pingtung University of Science and Technology*

ACEAIT-7461**Soft Computing Approaches to Pneumatic Control System: An Application to Suspension Test Bench**

Hsin-Han Chiang | *Fu Jen Catholic University*

Lian-Wang Lee | *Lunghwa University of Science and Technology*

Tsu-Tian Lee | *Tamkang University*

ACEAIT-7506**Performance Analysis of Power Steering Oil Pump Applying Al Material**

Yunchan Shin | *Chosun University*

Gwanghyun Im | *Chosun University*

Jongkuk Kim | *Younghwa Inc*

Honghyun Cho | *Chosun University*

ACEAIT-7538**Estimate of Mixed Convection Heat Transfer and Fluid Flow Characteristics of Plate-Fin Heat Sink in the Opening of the Enclosure**

Han-Taw Chen | *National Cheng Kung University*

Chung Yi Wu | *National Cheng Kung University*

ACEAIT-7614**Effect on the Boiling Characteristics in the Pool Boiling of Al_2O_3 Nanofluid**

Junggyun Ham | *Chosun University*

Gwanghyun Im | *Chosun University*

Honghyun Cho | *Chosun University*

ACEAIT-7686**Laser Beam Shaping Based on Genetic Algorithm Optimization**

Yi Chin Fang | *National Kaohsiung First University of Science and Technology*

Cheng Mu Tsai | *National Chung Hsing University*

ACEAIT-7297**An Artificial Intelligence Method to Investigate the Locations of Trader's Stall for Periodical Products**

Yi-Chih Hsieh | *National Formosa University*

Pei-Ju Lee | *National Chung Cheng University*

Yung-Cheng Lee | *WuFeng University*

ISFAS-1470**Characteristic and Efficiency Analysis of Storage-Type Solar PV/Thermal Hybrid**

Feng-Chin Tsai | *Tungnan University*

Jen-Ching Huang | *Tungnan University*

Xin-Zhi Huang | *Tungnan University*

ISFAS-1579**Natural Convection in Inclined Wavy-Wall Cavity Filled with Al_2O_3 -Water Nanofluid Using Heatline Technique**

Ching-Chang Cho | *National Formosa University*

Ching-Huang Chiu | *National Formosa University*

Kuo-Ching Chiu | *National Formosa University*

Chong-You Lai | *National Formosa University*

ISFAS-1482**A Study on Mechanical Behaviors of Si/Ge Core-Shell Nanowires by Molecular Dynamics Simulation**

Yu-Shan Lin | *National Cheng Kung University*

Tei-Chen Chen | *National Cheng Kung University*

ISFAS-1577**Applications of Magnetic Particles to Adsorb Emerging Contaminants in Aqueous Solution**

Hua-Wei Chen | *St. Mary's Medicine, Nursing and Management College*

Yo-Ping Wu | *National Ilan University*

Shu-Han Chang | *National Ilan University*

Chyow-San Chiou | *National Ilan University*

ISFAS-1593**Surface Enhanced Raman Scattering on Periodic Gold Nanowire Arrays**

Yu-Chung Chang | *National Changhua University of Education*
