

Contents

I. An Introduction to Pseudopotentials and Total Energy Calculations

I.1. Overview of Chapters	I-1
I.2. Background Information: Essential Theory of Pseudopotential.....	I-3
I.2.0. What Is A Pseudopotential d How Is It Used ?	I-4
I.2.1. The OPW (Orthogonalised Plane Wave) View Point	I-5
I.2.2 <i>Ab initio</i> Pseudopotentials from Pseudising and Inverting Wave Functions	I-6
I.2.4 Unscreening Pseudopotentials	I-8
I.2.5 Norm-conserving Pseudopotentials	I-9
I.2.6 The Kleinman-Bylander Form of A Pseudopotential	I-12
I.2.7. BHS table for excited states, and comments	I-14
I.3. Total Energy Calculation	I-15

II. Optimised Pseudopotentials with Kinetic Energy Filter Tuning

II.1. Introduction	II-2
II.2. The Q_c Tuning Method	II-7
II.3. Generation and Test of Some Pseudopotentials	II-9
II.4. Discussion and Conclusion	II-10

III. Non-local Projector Reduction in Optimised Pseudopotentials

III.1. Introduction	III-1
III.2. The Projector Reduction Method and Examples	III-4
III.3. Atomic and Solid State Test	III-7
III.4. Discussion	III-9
III.5. Conclusion	III-10

IV. Local and Partly Local Pseudopotentials from A Non-local Method

IV.1. Introduction	IV-1
IV.2. Reducing The Non-locality in Different Cases	IV-5
IV.3. Case Studies of Al, Si and Ge	IV-7
IV.4. Discussion and Conclusion	IV-12

V. Pseudopotentials Generated and Tested for Collaborations

V.1. The Art of Generating Pseudopotentials	V-2
V.2. A List of Working Pseudopotential	V-4

VI. Ideas for Further Research

VI.1. Pseudo Core Overlap	VI-2
VI.2. Softer Si Pseudopotentials	VI-5
VI.3. The Special Cases of the I-A and II-A Elements	VI-7

VII. The Origin of Disorder in $\gamma\text{-Al}_2\text{O}_3$

VII.1. Introduction -----	VII-1
VII.2. Background Experimental Information -----	VII-4
VII.3. Configuration Energies from First Principles Calculations -----	VII-7
VII.4. The Model Hamiltonian -----	VII-11
VII.4.1. Constructing a Simplified Model Hamiltonian -----	VII-11
VII.4.2. Determine The Parameters in Model Hamiltonian -----	VII-13
VII.5. Simulation of Structures and Comparison with Experiments -----	VII-14
VII.6. Discussion : Geometrical Interpretation of Results -----	VII-19
VII.7. Plans for Possible Further Work -----	VII-22
