

## TABLE OF CONTENTS

LIST OF FIGURES .....	iv
LIST OF TABLES .....	vi
Chapter 1 Introduction and Objectives .....	1
Chapter 2 Background .....	7
2.1 Anaerobic Digestion.....	7
2.2 Microbial Community in Digesters .....	8
2.3 Acetoclastic Methanogens .....	10
2.4 Ammonia Toxicity.....	12
2.5 Inducing Agents .....	15
2.6 Viruses and Their Connection to Process Stability .....	16
2.7 Viruses of Methanogens.....	18
2.8 Clustered Regularly Interspaced Short Palindromic Repeats (CRISPRs) .....	21
Chapter 3 Overview of Materials and Methods .....	29
3.1 Enrichment Reactors.....	29
3.2 Feed Media.....	31
3.3 Gassing Station and Oxygen Scrubbing Device .....	34
3.4 Anaerobic Chamber .....	34
3.5 Transmission Electron Microscopy (TEM) .....	35
3.6 Epifluorescence Microscopy (EFM).....	36
3.7 Glycerol Stock of Methanogens.....	37
Chapter 4 Improving Culture Methods for <i>Methanosaeta</i> Using Solid Media .....	38
4.1 Introduction.....	38
4.2 Materials and Methods.....	40
4.2.1 <i>Methanosaeta</i> Cultures and Media .....	40
4.2.2 Methane Measurement.....	43
4.2.3 Virus Size-fraction Filtrate (VSF).....	44
4.2.4 Plaque Assay .....	45
4.3 Results and Discussion .....	46
4.3.1 Gellan Gum Concentration .....	46
4.3.2 Cultivation Containers and Plating Techniques .....	47
4.3.3 Fragmentation of <i>Methanosaeta</i> .....	50
4.3.4 Plaque Assays.....	52
4.4 Conclusions.....	53
Chapter 5 Ammonia Toxicity and the Assessment of Infection Tests for <i>Methanosaeta</i> .....	55
5.1 Introduction.....	55

5.2 Materials and Methods.....	56
5.2.1 Acetate Solution and Anoxic DI water.....	56
5.2.2 Collection of Virus Size-fraction Filtrates from Upset Digesters .....	57
5.2.3 Concentrating VLPs.....	57
5.2.4 Infection Test Setup .....	58
5.3 Results and Discussion .....	60
5.3.1 Investigating the Inhibition of Methanogenesis.....	60
5.3.2 Evaluation of Potential Ammonia Toxicity.....	75
5.3.3 Assessment of Improved Infection Tests for Screening <i>Methanosaeta</i> viruses....	85
5.4 Conclusions.....	95
Chapter 6 Characterizing microbial and viral communities in enrichment reactors .....	97
6.1 Introduction.....	97
6.2 Materials and Methods.....	98
6.2.1 Autofluorescence Microscopy .....	98
6.2.2 Pulsed Field Gel Electrophoresis (PFGE).....	98
6.2.3 DNA Extraction .....	100
6.2.4 Quantitative PCR (qPCR).....	100
6.2.5 Clone Libraries and Phylogenetic Analysis .....	102
6.2.6 Size Measurement of VLPs.....	103
6.3 Results.....	103
6.3.1 Morphology of VLPs .....	103
6.3.2 Size distribution of VLPs.....	106
6.3.3 Concentration of VLPs using EFM.....	108
6.3.4 Genome size of VLPs .....	109
6.3.5 Performance of the Acetate-fed Reactors .....	111
6.3.6 Dominant Reactor Microorganisms.....	111
6.4 Discussion.....	114
6.4.1 VLPs in Enriched Reactors .....	114
6.4.2 Enriched Cultures and Microbial Communities .....	116
6.4.3 VLPs and Enriched Cultures.....	118
6.5 Conclusions.....	121
Chapter 7 The study of the connection between viruses and <i>Methanosaeta</i> using a genomic approach based on clustered regularly interspaced short palindromic repeats (CRISPRs).....	123
7.1 Introduction.....	123
7.2 Materials and Methods.....	124
7.2.1 Overview of the experimental approaches.....	124

7.2.2 Sequencing Enrichments and <i>Methanosaeta concilii</i> Genomes .....	125
7.2.3 <i>Methanosaeta concilii</i> CRISPR/Cas System Comparison.....	126
7.2.4 CRISPR and Spacer Identification.....	126
7.2.5 Spacer Similarity Search.....	127
7.2.6 Analysis of Protospacer Adjacent Motif (PAM) .....	128
7.3 Results and Discussion .....	128
7.3.1 Sequencing and Assembly Statistics .....	128
7.3.2 CRISPR/Cas of <i>Methanosaeta concilii</i> .....	130
7.3.3 Repeats and Spacers of Enrichments and <i>Methanosaeta concilii</i> .....	138
7.3.4 Studying the Relationship between Viruses and Hosts using CRISPR .....	146
7.4 Conclusions.....	156
Chapter 8 Conclusions .....	158
Appendix A An Analysis of Viral Metagenomes in Acetate-fed Anaerobic Reactors .....	171
