Acknowledgments	i
Chinese Abstract	iii
Abstract	vii
1 Introduction	1
2 Basic Concepts	3
2.1 Molecular Orbital Theory	3
2.1.1 Origin and Labelling of Molecular Orbitals	3
2.1.2 Characteristic Resonances in K-Shell Spectra	8
2.2 Radiation Absorption and Emission in Solids	12
2.2.1 Near-Edge X-ray Absorption Fine Structure (NEXAFS)	12
2.2.2 X-ray Photoelectron Spectroscopy (XPS)	18
2.3 Charge Transport in Organic Materials	21
2.3.1 Energy Level Alignment at Metal/Organic Interface	21
2.3.2 Charge Injection and Transport in Organics	25
2.4 Spin-polarized Transport Models	28
2.4.1 Tunnel Magnetoresistance	28
2.4.2 Giant Magnetoresistance	30
3 Experimental Apparatus	33
3.1 UltraHigh Vacuum (UHV) Sputtering System	33
3.2 Magneto-transport properties	34
3.2.1 Four-probe Resistance Measurement	34
3.2.2 Magneto-Optical Kerr Effect (MOKE)	36

Contents	ii
3.3 Synchrotron Radiation	36
3.3.1 Scanning PhotoElectron Microscopy (SPEM)	40
3.3.2 PhotoElectron Emission Microscopy (PEEM)	42
3.3.3 Magnetic Circular Dichroism and X-ray Absorption Spectroscopy	44
4 Depth Profiling Photoelectron-Spectroscopic Study of Organic Spin Valve with Plasma-Modified Pentacene Spacer	46
4.1 Pentacene (PC) and Plasma Modification	47
4.2 Sample Fabrication	47
4.3 Organic PC Spin-valve and MR performance	48
4.4 Crystalline Structure of PC on Different substrate	50
4.5 Effect of Oxygen Plasma Modification on the Transport Properties . .	50
4.6 Electronic Structure of Plasma-modified PC	53
4.7 Depth Profiling Electronic Structure of Plasma-modified PC	55
4.8 Summary	57
5 Interfacial Spectroscopic Characterization of Organic/Ferromagnet Hetero-junction of PTCDA-based Organic Spin Valves	58
5.1 Sample Fabrication - PTCDA spin-valve	59
5.2 MR performance of Organic Spin-valve	59
5.3 Angular Dependence of Molecular Orientation - NEXAFS	60
5.4 Interface properties - XPS	66
5.5 Summary	68
6 Spectro-microscopic Investigation on the Electronic Structure of Proton-irradiated Epitaxial Graphene	69
6.1 Sample Fabrication	70
6.2 Topography - AFM Investigation on the Proton-irradiated Sample . .	70
6.3 Space-Resolved Molecular Orientation - PEEM	71
6.4 Space-Resolved Electronic Structure - SPEM	74
6.5 Summary	77
7 Conclusion	78
Bibliography	81

Appendix	90
A.1 Curriculum Vita	90
