

Contents**Preface IV****Chapter 1****Introduction 1**

- 1.1 Background of the study 1
- 1.2 Purpose and significance of the study 7
- 1.3 Research questions 10
- 1.4 Organization of the book 10

Chapter 2**Extensive Reading and Multiple Intelligences Theory 12**

- 2.1 Rationales for extensive reading 12
- 2.2 Efficacy and challenges of extensive reading 14
- 2.3 MI in language classrooms 16
- 2.4 Design of thematic activities in the ER classroom 19
- 2.5 Implementation of the ER program 20
- 2.6 Reciprocity of reading and writing 23
- 2.7 Pluralism and the issues of diversity 24
- 2.8 Reading and empathy 25
- 2.9 Reading and gender 26
- 2.10 Computer technology and language learning 27

Chapter 3**Methodology 29**

- 3.1 Participants and treatment materials 29
- 3.2 Treatment method 32
- 3.3 Treatment platform 39
- 3.4 Instruments 50
- 3.5 Procedure and statistical analysis 55

Chapter 4**Results 62**

- 4.1 Results of the pilot study 62
- 4.2 Results of the main study 73
 - 4.2.1 Extensive reading 73
 - 4.2.2 Multiple intelligences 78
 - 4.2.3 Cultural and global awareness 83
 - 4.2.4 Writing data 92
 - 4.2.5 Submission rate and discussion board 101
 - 4.2.6 Post-treatment survey 110
- 4.3 Summary of findings 114

Chapter 5**Discussion of Findings 118**

- 5.1 Reading attitude, motivation and enjoyment 118
- 5.2 Reading and writing 121
- 5.3 Reading and multiple intelligences 122
- 5.4 Reading, intercultural and global awareness 124
- 5.5 Gender and reading 126
- 5.6 CALL and reading 128
- 5.7 Summary 129

Chapter 6**Conclusion 132**

- 6.1 Pedagogical implications 132
- 6.2 Limitations of the study 133
- 6.3 Recommendations for future studies 135

Preface

The merits of reading are many. It promotes literacy which also includes writing ability. Such benefits are equally extended to EFL (English as a Foreign Language) learners. Among different types of reading, extensive reading (ER) has been closely examined in EFL classrooms in Taiwan. It has been found that ER promotes reading comprehension, reading speed, vocabulary learning and retention, and above all, raising test scores of high-stake exams such as TOEIC and GEPT. Similarly, the research reported in this book explores the benefits of reading. Yet, unlike earlier studies, this research involves empirical studies on two modified ER programs reading abridged and simplified literary fictions to investigate Taiwan's young adults' perception of MI, intercultural sensitivity and global awareness after having participated in these programs. One program was infused with regular reading activities that relied heavily on verbal and logical intelligences, while the other was infused with Multiple Intelligences activities which included other types of intelligences such as natural, musical, interpersonal, intrapersonal, visual-spatial, and existence intelligences. In short, the book discusses the relationship among ER, MI, and intercultural and global awareness.

Chapter one of the book introduces the background of the research on ER, MI and the importance of developing non-cognitive skills such as inter-cultural sensitivity and empathy through reading literary fictions. Chapter two provides an overview of relevant literature on ER, MI, reading activities, reciprocity of reading and writing, pluralism in multiculturalism, gender and reading, and finally computer technology and reading. Chapter three presents the rationales and details for the design of the two reading programs

adopted in the studies. The methodology for investigating the efficacy of this design will be explained as well. Chapter four introduces the results of the two studies, starting from those of the pilot, followed by the findings of the main study.

Chapter five in turn discusses these findings that could help answer the research questions set out in the beginning of the book, which are namely issues of motivation in reading, development of MI, improvement in writing skill, enhancement of inter-cultural sensitivity and global awareness, and finally whether gender is an important confound in these findings. Even though the role of computer technology is not one of the research questions, but based on the findings of the studies, some limitations and implications of computer-assisted language learning (CALL) will also be discussed. Finally, chapter six, the conclusion, closes the book by providing some pedagogical suggestions to implementing reading programs in the tertiary environment in Taiwan and ideas for future research.
