Acknowledgement .....	1
Abstract .....	2
Chapter 1: The Determinants of Internal Capital Provision and Receipt: Evidence from the Intra-Group Reinsurance Activities of the U.S. Non-Life Insurance Industry .....	4
1. Introduction .....	4
2. Literature Review and Hypotheses Development .....	11
2.1 Several strands of studies on internal capital markets .....	11
2.2 Hypotheses Development .....	14
3. Data, Methodology, and Variables .....	23
3.1 Data .....	23
3.2 Regression Model .....	24
3.3 Variables .....	25
4. Empirical Results .....	31
4.1 Data Description .....	31
4.2 Descriptive statistics, correlation coefficients, and univariate analysis .....	35
4.3 Multivariate analysis .....	42
4.4 Non-Linear Effects of External Reinsurance, Investment Risk, and Underwriting Risk on Internal Reinsurance Decisions .....	49
4.5 Robustness Checks .....	53
5. Conclusion .....	57
Appendix A .....	58
Reference .....	62
Chapter 2: The Interrelations among Internal Capital Markets Activities, Capital Holding, and Risk-Taking: Evidence from the Intra-Group Reinsurance Transactions of the U.S. Non-Life Insurance Industry .....	68
1. Introduction .....	68
2. Literature Review and Hypotheses Development .....	75
2.1 The Literature on Capital and Risk-Taking .....	75
2.2 Internal Capital Markets .....	80
2.3 Hypotheses Development .....	83

3. Data, Methodology, and Variables .....	93
3.1 Data .....	93
3.2 Variables.....	93
3.3 Methodology and Endogeneity Tests .....	98
4. Empirical Results.....	105
4.1 Descriptive Statistics, Univariate Analysis, and Correlations .....	105
4.2 Regression Results.....	110
5. Conclusion.....	120
Appendix B.....	122
Reference.....	129
Chapter 3: The Roles of Internal Capital Markets, External Financing, and Premiums Growth in Capital Structure Adjustment: Evidence from the U.S Non- Life Insurance Industry .....	135
1. Introduction .....	135
2. Literature Review and Hypotheses Development .....	142
2.1 The Literature on Target Capital Structure.....	142
2.2 The Possible Capital Adjustment Channels.....	144
3. Data, Methodology, and Variables .....	154
3.1 Data .....	154
3.2 Methodology.....	155
3.3 Variables.....	157
4. Empirical Results.....	164
4.1 Descriptive Statistics .....	164
4.2 Partial Adjustment Model.....	164
4.3 The Correlations between the Deviation from Target Leverage and Capital Adjustment Channels .....	168
4.4 Univariate Analysis .....	169
4.5 The Effects of the Deviation from Target Leverage on Capital Adjustment Channels .....	171
4.6 Further Analysis .....	180
5. Conclusion.....	183
Appendix C.....	185
Reference.....	189

## List of Tables

### Chapter 1: The Determinants of Internal Capital Provision and Receipt: Evidence from the Intra-Group Reinsurance Activities of the U.S. Non-Life Insurance Industry

Table 1- 1	Summary of research hypotheses .....	22
Table 1- 2	Variable definitions .....	30
Table 1- 3	Number of internal reinsurance participants during sample period.....	33
Table 1- 4	The comparison of providers and recipients: total admissible assets and the composition of premiums written (1999 to 2016) .....	36
Table 1- 5	Descriptive statistics .....	37
Table 1- 6	Correlation Coefficients.....	37
Table 1- 7	Univariate analysis: the comparison of internal reinsurance providers, recipients, and non- participants .....	40
Table 1- 8	Univariate difference across intra-group reinsurance participation status .....	41
Table 1- 9	Multivariate regression analysis .....	43
Table 1- 10	The non-linearity in the effects of external reinsurance, investment risk, underwriting risk, and hurricane exposure on internal reinsurance decisions .....	51
Table 1- 11	Multivariate regression with consideration of potential endogeneity of the main explanatory variables .....	55

**Chapter 2: The Interrelations among Internal Capital Markets Activities, Capital Holding, and Risk-Taking: Evidence from the Intra-Group Reinsurance Transactions of the U.S. Non-Life Insurance Industry**

Table 2- 1	Summary of research hypotheses .....	92
Table 2- 2	Variable definitions .....	97
Table 2- 3	The results of endogeneity tests.....	104
Table 2- 4	Descriptive statistics for the subsamples categorized by intra-group reinsurance participation status.....	106
Table 2- 5	Univariate analysis on the adjustments of internal reinsurance activities, capital holding, and portfolio risk.....	107
Table 2- 6	Correlations among internal reinsurance activities, capital, and risk ....	110
Table 2- 7	The effects of intra-group reinsurance status changes: the subsample of internal reinsurance providers in previous year.....	113
Table 2- 8	The effects of intra-group reinsurance status changes: the subsample of internal reinsurance recipients in previous year .....	114
Table 2- 9	The effects of intra-group reinsurance status changes: the subsample of non-participants in previous year.....	115

**Chapter 3: The Roles of Internal Capital Markets, External Financing, and Premiums Growth in Capital Structure Adjustment: Evidence from the U.S Non-Life Insurance Industry**

Table 3- 1	Summary of research hypotheses .....	153
Table 3- 2	Variable definitions .....	163
Table 3- 3	Descriptive statistics of the variables used in the estimation of target leverage.....	165
Table 3- 4	The estimation of target leverage for the subsamples partitioned by intra-group reinsurance participation status .....	166
Table 3- 5	The correlations between the deviation from target leverage and the channels of capital adjustments .....	169
Table 3- 6	Univariate analysis on capital adjustment channels by intra-group reinsurance participation status.....	170
Table 3- 7	The effects of capital structure deviation on internal reinsurance and internal capital transfer .....	172
Table 3- 8	The effects of capital structure deviation on external reinsurance and capital issuance .....	176
Table 3- 9	The effect of capital structure deviation on premiums growth.....	179
Table 3- 10	The coefficients on target leverage deviation in capital adjustment channel equations: split the samples by capitalization .....	181

## Tables in Appendix

Table A- 1	Multivariate regression with consideration of potential endogeneity of the main explanatory variables (pure providers and recipients are excluded).....	60
Table A- 2	Multivariate regression with consideration of potential endogeneity of the main explanatory variables (using unwinsorized sample).....	61
Table B- 1	The results of over-identification tests .....	123
Table B- 2	Correlation Coefficients (Providers).....	124
Table B- 3	Correlation Coefficients (Recipients) .....	125
Table B- 4	Correlation Coefficients (Non-participants) .....	126
Table B- 5	Regression analysis for the subsample of the internal reinsurance providers without status changes.....	127
Table B- 6	Regression analysis for the subsample of the internal reinsurance recipients without status changes.....	128
Table C- 1	The effects of target leverage deviation on internal reinsurance: split the samples by capitalization.....	185
Table C- 2	The effects of target leverage deviation on internal capital transfer: split the samples by capitalization.....	186
Table C- 3	The effects of target leverage deviation on external reinsurance and capital issuance: split by capitalization.....	187
Table C- 4	The effect of target leverage deviation on premiums growth: split by capitalization.....	188

## List of Figures

**Figure 1-1** The average amount of direct premiums written, internal and external reinsurance premiums, and net premiums written of the U.S. non-life insurance industry (1999 to 2016) ..... 32
