Chinese Abstract	i
Abstract	iii
1. Introduction	1
2. Externality of External Knowledge, Tolerable Coordination Cost and Co-authorship	12
2.1 Introduction	12
2.2 Modelling	15
2.3 The Equilibrium of Two-player Sequential Game.....	18
2.3.1 Subgame Perfect Equilibrium	18
2.3.2 Tolerable Coordination Cost	26
2.4 Conclusions	27
3. Effect of Growing External Knowledge Stock on Co-authorship Formation under Symmetrical externalities	29
3.1 Introduction	29
3.2 Effect of Growing External Knowledge Stock on Individual's Choice of Co-authorship	30
3.3 Effect of Growing External Knowledge Stock on Propensity to Coauthor	32
3.4 Conclusions	41
4. Effect of Growing External Knowledge Stock on Co-authorship Formation under Asymmetrical Externalities	43
4.1 Introduction	43
4.2 Effect of Growing External Knowledge Stock on Individual's Choice of Co-authorship	44
4.3 Effect of Growing External Knowledge Stock on Propensity to Coauthor	53
4.4 Conclusions	60
5. Conclusions	62
References	66
Appendix	69

Figure Contents

Figure 2-1. Tolerable coordination cost of an academic engaging in co-authorship	23
Figure 3-1. Pattern of an academic's tolerable coordination cost with externality (a) $r_i > -b/2$ and (b) $r_i < -b/2$	34
Figure 3-2. (Left) Tolerable coordination costs of two academics both with externality $r_i > -b/2$ (Right) Propensity for two academics forming co-authorship both with externality $r_i > -b/2$	36
Figure 3-3. (Up) Tolerable coordination costs of two academics both with externality $r_i < -b/2$ (Down) PCO for two academics both with externality $r_i < -b/2$ when random variable h has an upper bound (Left) \bar{h} , (Middle) \tilde{h} , and (Right) \hat{h}	37
Figure 4-1. States S1-S3 in r_1 - r_2 plane	46
Figure 4-2. An individual author's tolerable coordination is an increasing function in K if $r_1 + r_2 \geq -b$, $r_1 \geq -b$ and $r_2 \geq -b$	47
Figure 4-3. An individual author's tolerable coordination cost suppose $b=2$, $a_1=50$, $a_2=50$ with different values of r_1 and r_2	48
Figure 4-4. Propensity for two authors forming collaboration supposing $b=2$, $a_1=50$, $a_2=50$, $\bar{h}=1000$ with different values of r_1 and r_2	55

Table Contents

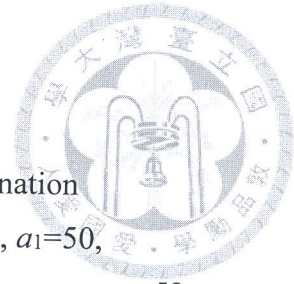

Table 4-1. The feature of an individual author's tolerable coordination cost with asymmetrical externalities supposing $b=2$, $a_1=50$, $a_2=50$	52
Table 4-2. Effects of growing external knowledge stock on propensity for two authors (with asymmetrical externalities) forming co-authorship	58
