CURRICULUM VITAE ix

ABSTRACT OF THE DISSERTATION x

Introduction 1

1 **Soliton Hierarchies from Splittings of Lie Algebra** 6
- 1.1 Soliton Hierarchy constructed from $\mathcal{L}^{\tau}_{\pm}(\mathcal{G})$ and $\{a\lambda^j \mid j \geq 1\}$ . . . . . 6
- 1.2 Soliton Hierarchy constructed from $\mathcal{L}^{\tau,\sigma}_{\pm}(\mathcal{G})$ and $\{a\lambda^{2j} \mid j \geq 1\}$ . . . . 19
- 1.3 Soliton Hierarchy Constructed from $\mathcal{L}^{\tau,\sigma}_{\pm}(\mathcal{G})$ and $\{a\lambda^{2j+1} \mid j \geq 1\}$ . . . 22

2 **Schrödinger Flows on Hermitian Symmetric Spaces** 27
- 2.1 Schrödinger Flows on Compact Kähler Manifolds . . . . . 27
- 2.2 Schrödinger Flows on Hermitian Symmetric Spaces $\frac{U}{K}$ and Relation with $\frac{U}{K}$-NLS Equations . . . . . 29

3 **Geometric Airy Curve Flows** 35
- 3.1 Equivalence of Geometric Airy Equations on $\mathbb{R}^n$ and Vector Modified KdV Equation . . . . . 35
- 3.2 Geometric Airy Curve Flows on $\mathbb{S}^n$ . . . . . 41
- 3.3 Geometric Airy Curve Flows on $\mathbb{H}^n$ . . . . . 44

4 **Bäcklund Transformations** 49
- 4.1 Bäcklund Transformations for $\frac{U}{K}$-NLS and Schrödinger Flows . . . . . 49
- 4.2 Bäcklund Transformations for Derivative $\frac{U}{K}$-NLS . . . . . 62
- 4.3 Bäcklund Transformations for vector mKdV and Geometric Airy Curve Flow on $\mathbb{R}^n$ . . . . . 70

**5 Periodic Cauchy Problems** **75**
5.1 Periodic Cauchy Problems for Schrödinger Flow on $\mathbb{S}^2$ . . . . . 75
5.2 Periodic Cauchy Problems for VFE on $\mathbb{R}^3$ . . . . . 79
5.3 Periodic Cauchy Problems for Geometric Airy Curve Flow on $\mathbb{R}^2$ . . . 88

**6 Numerics** **91**
6.1 Geometric Algorithms . . . . . 92
6.2 Numerical Experiments . . . . . 96

**Bibliography** **117**

**Appendices** **119**
A Appendix A . . . . . 119

# LIST OF FIGURES

Page

6.1 Numerical solution $\gamma(x,t)$ of VFE where $\gamma(x,0) = (2\cos x, \sin x, 0)$ . . 98
6.2 Solution $q$ of NLS corresponding to $\gamma(x,t)$ in Figure 6.1 . . . . . 99
6.3 Numerical solution $\gamma(x,t)$ of VFE where $\gamma(x,0) = (\cos x, \sin x, \cos x)$ 99
6.4 Solution $q$ of NLS corresponding to $\gamma(x,t)$ in Figure 6.3 . . . . . 100
6.5 Numerical solution $\gamma(x,t)$ of VFE where $\gamma(x,0) = (e^{0.1\cos x}, \sin x, 0)$ . 100
6.6 Solution $q$ of NLS corresponding to $\gamma(x,t)$ in Figure 6.5 . . . . . 101
6.7 Apply BT to $\gamma(x,t) = (\cos x, \sin x, t)$ . . . . . 101
6.8 Apply BT to $\gamma(x,t)$ where $\gamma(x,0) = (2\cos x, \sin x, 0)$ . . . . . 102
6.9 $\gamma(x,t)$: the solution of Schrödinger flow on $\mathbb{S}^2$ with initial data $\gamma_0 = (\cos x \cos(2x), \sin x \cos(2x), \sin(2x))$ . . . . . 107
6.10 Solution $q$ of NLS corresponding to $\gamma(x,t)$ in Figure 6.9. The solid line represents the real part of $q$ while the dashed one shows the imaginary part of $q$. . . . . 107
6.11 $\gamma(x,t)$: the solution of Schrödingier flow on $\mathbb{S}^2$ with initial data $\gamma_0 = (0.5\sin(2x), \sin x, \sqrt{1 - 0.25\sin^2(2x) - \sin^2 x})$ . . . . . 108
6.12 Solution $q$ of NLS corresponding to $\gamma(x,t)$ in Figure 6.11. The solid line represents the real part of $q$ while the dashed one shows the imaginary part of $q$. . . . . 108
6.13 Apply BT to $\gamma(x,t) = (\cos x, \sin x, 0)$ . . . . . 109
6.14 Apply BT to $\gamma(x,t)$ in Fig. 6.9 . . . . . 110
6.15 Apply BT to $\gamma(x,t)$ in Fig. 6.11 . . . . . 110
6.16 Solution of Geometric Airy curve flow on $\mathbb{R}^2$ with initial data $\gamma_0 = (2\cos(2x), \sin(2x))$ . . . . . 112
6.17 Solution $q$ of mKdV corresponding to $\gamma(x,t)$ in Figure 6.16. The solid line represents the real part of $q$ and the dashed one shows the imaginary part of $q$. . . . . 113
6.18 Solution of Geometric Airy curve flow on $\mathbb{R}^2$ with initial data $\gamma_0 = (\cos x + 0.7\sin x \cos x, \sin x + 0.7\sin x \sin x)$ . . . . . 113
6.19 Solution $q$ of mKdV corresponding to $\gamma(x,t)$ in Figure 6.18. The solid line shows the real part of $q$ while the dashed one is the imaginary part of $q$. . . . . 114
6.20 Solution of Geometric Airy curve flow on $\mathbb{R}^2$ with initial data $\gamma_0 = (\sqrt{\sin(2x)}\cos x, \sqrt{\sin(2x)}\sin x)$ . . . . . 114

6.21 Solution $q$ of mKdV corresponding to $\gamma(x,t)$ in Figure 6.20. The solid line shows the real part of $q$ while the dashed one is the imaginary part of $q$. . . . . 115
6.22 Apply BT to $\gamma(x,t) = (\cos(x+\frac{t}{2}), \sin(x+\frac{t}{2}))$ . . . . . 115
6.23 Apply BT to the solution $\gamma(x,t)$ of geometric Airy curve flow on $\mathbb{R}^2$ with initial data $\gamma(x,0) = (2\cos x, \sin x)$ . . . . . 116
6.24 Apply BT to $\gamma(x,t)$ in Fig. 6.20 . . . . . 116

# LIST OF TABLES

Page

6.1 Errors with the true solution $\gamma$ and the numerical solution $\gamma_n$ . . . . . 97
6.2 Conserved Quantities Error for VFE with initial data $\gamma_0 = (\cos x, \sin x, 0)$ 103
6.3 Errors with the true solution $\gamma$ and the numerical solution $\gamma_n$ . . . . . 105
6.4 Conserved Quantities Error for Schrödinger flow with initial data $\gamma_0 = (\cos x, \sin x, 0)$ . . . . . 106
6.5 Errors with the true solution $\gamma$ and the numerical solution $\gamma_n$ . . . . . 111
6.6 Conserved Quantity Errors for Airy curve Flow on $\mathbb{R}^2$ with initial data $\gamma_0 = (\cos x, \sin x)$ . . . . . 112
A.7 Conserved Quantity Errors for Schrödinger Flow on $\mathbb{S}^2$ with initial data $\gamma_0 = (0.5\sin(2x), \sin x, \sqrt{1 - 0.25\sin(2x)^2 - \sin^2 x})$ . . . . . 119
A.8 Conserved Quantity Errors for Schrödinger Flow on $\mathbb{S}^2$ with initial data $\gamma_0 = (\cos x \cos(2x), \sin x \cos(2x), \sin(2x))$ . . . . . 120
A.9 Conserved Quantities Error for VFE with initial data $\gamma_0 = (\sin x + \cos x, \sin x, \cos x)$ . . . . . 121
A.10 Conserved Quantities Error for solution $\gamma(x,t)$ of VFE where $\gamma(x,0) = (\sin x \cos(2x), \sin x, \cos x)$ . . . . . 122
A.11 Conserved Quantity Errors for Airy curve Flow on $\mathbb{R}^2$ with initial data $\gamma_0 = (2\cos x, \sin x)$ . . . . . 123
A.12 Conserved Quantity Errors for Airy curve Flow on $\mathbb{R}^2$ with initial data $\gamma_0 = (\cos x + 0.7\sin x \cos x, \sin x + 0.7\sin x \cos x)$ . . . . . 124
